- % Done changed from 0 to 90

I implemented sync and provisioning for a user-type.

- For sync I making transformation from ID or user-type code automatically.
- Input value in provisioning is whole user-type object (IdmFormProjection).

Tests and documentation were also created.

Documentation: https://wiki.czechidm.com/devel/documentation/synchronization/dev/synchronization#user_type_projection

I did test and code review, it works, thx for this feature.

Note: Projection uuid filled in source data on target system is not supported now (IllegalAccessException: Wrong type of value [8975a5c5-d822-432a-9682-a51ce5d6f19c]. Value must be instance of [class java.util.UUID] type, but has type [class java.lang.String]). I hope is not needed.
