

CzechIdM - Task #2219

Authorization policies - add autocomplete permission to LRT.

04/20/2020 11:13 AM - Radek Tomiška

Status:	Closed	Start date:	04/20/2020
Priority:	Low	Due date:	
Assignee:	Radek Tomiška	% Done:	100%
Category:	Authentication / Authorization	Estimated time:	0.00 hour
Target version:	10.3.0		
Description			
When bulk action is executed, then read LRT permission is needed. Add new autocomplete permission to long running task => and use it to see progress of LRT by normal user.

- % Done changed from 0 to 90

I removed duplicate "LONGRUNNINGTASK" group permission (added recently) and two new permissions created / used in the "SCHEDULER" group:

- "DELETE" - used for delete LRT from long running task agenda.

- "AUTOCOMPLETE" - used to see progress of bulk action.

Could you provide me a feedback, please?

I did review and test. Works nice. I need only autocomplete permission now.

In Export/Import documentation I suggestion add READ permission for scheduler. I modified this documentation for use autocomplete, but maybe READ permission could works still in this case. Users would then not have to change settings. What do you think?

#5 - 04/29/2020 06:01 AM - Radek Tomiška

Sorry i overlook it in Export/Import documentation. I didn't added the READ permission to be the same as other endpoints.
